

DEXSwapper

DEXSF — Round 1 Whitepaper. The DEX, reinvented.

What is DEXSwapper?

DEXSwapper is a decentralised exchange where the platform's own token is backed by a real institutional trading pool — not memes, not hype, not promises. Every dollar raised feeds into a diversified, hedged trading operation, and the profits flow back to holders.

Watch a 60-second overview: youtu.be/WHLRLTYb18k

The two tokens

DEXS — the platform token. 100% of DEXS sales fund the trading pool. Profits are split:

- 67% → DEXS price growth (AUM-backed)
- 11% → lifetime dividends to holders
- 22% → operations

DEXSF — the founder series. Nine sequential rounds (R1–R9) that raise capital to grow DEXS's assets-under-management. The bigger the AUM, the bigger the dividends. Fair balance, by design.

Why Round 1 matters

R1 is the founder round — the cheapest entry across all 9 rounds. No future round will start below \$0.10. Holders get a double upside:

- ◆ Lifetime dividends from real trading profits — for as long as you hold
- ▲ Token-price growth — R1 is the lowest entry, every later round is priced higher

R1 Tokenomics

Total supply	112,500 DEXSF (fixed, immutable)
Token program	Token-2022 on Solana
Decimals	9
Mint authority	Disabled (immutable supply)
Freeze authority	Disabled (cannot be frozen)
Start price	\$0.10 (lowest of all 9 rounds)
End price	\$0.20
Net raise target	\$9,000 USDC
Top-holder concentration	4.79% (healthy)
Distribution mechanism	Meteora Dynamic Bonding Curve

The presale, reinvented

Most presales lock you in for months. DEXSF doesn't.

- ◆ Direct on-chain listing — tradeable from minute one
- ◆ Enter anytime · Exit anytime — no waiting
- ◆ No lockups, no vesting, no cliffs
- ◆ No team allocation outside the deployer wallet

On-chain references

Official contract address (Solana):

How to buy DEXSF

Three working paths — pick the one you prefer:

1. Jupiter (recommended)

One tap from any Solana wallet: jup.ag/swap/USDC-DEXSF...

2. Phantom token page

Opens directly in the Phantom app: phantom.com/tokens/solana/DEXSF...

3. Paste the CA into any DEX or wallet

Solflare · GMGN · Photon · BullX · Birdeye — they all support the CA above.

Roadmap (high-level)

R1	Founder round — LIVE	\$0.10 → \$0.20
R2	Q3 2026 (planned)	Higher base price
R3–R9	Progressive rounds	Never under \$0.10
DAMM v2	Auto-migration at graduation threshold	Permanent LP, lifetime fees
